### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the closest prior art of record, namely Patton, Speed and McClafin, fail to clearly teach or suggest a method of inhibiting bacteria from growing in a submersible well pump by the incorporation of a biocide in a coating applied to the internal and/or external surfaces of the components of the pump prior to connecting the pump to the motor and lowering it into the well for activation. Applicant's arguments regarding Patton and Speed wherein Patton teaches the admission of the bacteria into the system via the turbine oil and Speed's system does not teach the use of oil at all, were found to be persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
